The performance data quoted herein represents past performance and does not guarantee future results. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Market volatility can dramatically impact the fund's short-term performance. Current performance and expense ratio may differ from figures shown. For performance data current to the most recent month end, please call First Eagle Funds at 800.334.2143 or visit us at firsteaglefunds.com.

The average annual returns are historical and reflect changes in share price, reinvested dividends and are net of expenses. "With sales charge" performance gives effect to the deduction of the maximum sales charge of 5.00%.

The MSCI EAFE Index is a total return index, reported in U.S. dollars, based on share prices and reinvested net dividends of approximately 1,100 companies from 21 countries and is not available for purchase.

*1993 performance is for the period 08/31/93 to 12/31/93.

Investments are not FDIC insured or bank guaranteed and may lose value. There are risks associated with investing in funds that invest in securities of foreign countries, such as erratic market conditions, economic and political instability and fluctuations in currency exchange rates. Investment in gold and gold related investments present certain risks, and returns on gold related investments have traditionally been more volatile than investments in broader equity or debt markets.
